

Rotables Management Program

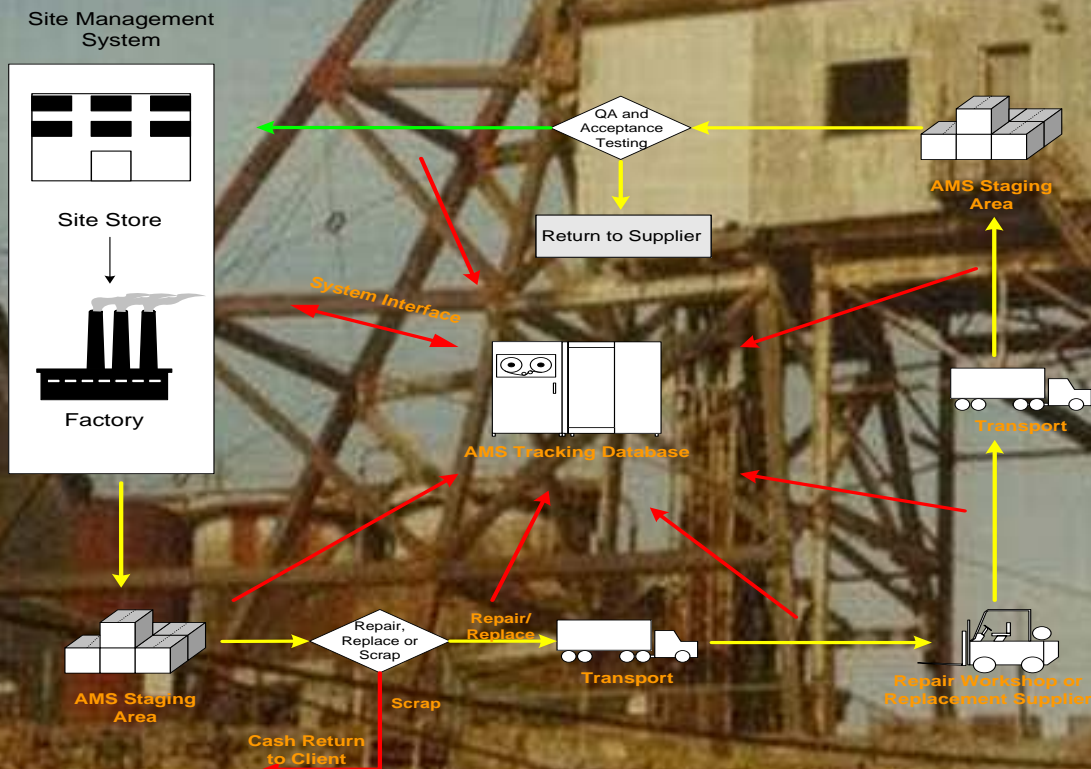

AMS Pty Ltd has found that the repair of Rotable inventory often fits into the non-core production task category. For this reason repairs, stock levels and traceability end up getting out of hand and become unmanageable for many companies.

This wastes not only time and money but can seriously affect business volume and viability when repaired parts go back into the plant and fail prematurely.

AMS Rotables Management drives down inventory levels and ensures the quality of repairs.

AMS Rotables Management Program offers the following:-

- AMS Pty Ltd Accredited Suppliers
 - ✓ Guaranteed Corporate Governance
 - ✓ Proven Repair performance
 - ✓ Quality Controlled processes
 - ✓ After repair testing
- Agreed Service and Repair KPI's,
